

Just to give you an idea this is simple outline of what I think is required to start

- 1) Upload CSV data or extract from external data Source

- 2) Display on chart (Chart Scrolls from right to left)

- **Green** dot do Nothing,
- **Red** sell (short) exit close
- **Blue** buy open exit close

- 3) Network settings

(Any network configuration that may be required)

4) Train

Train

5) Results

- a) Pip gained
- b) Average profit per trade
- c) Percentage correct

6) Save network... Export To a file or as a system to Metatrader

Export
